

Class of 1972 Updates Archive

03/08

03/24/08 Jayne Deaver in Her Own Words: I was just on the AHS website and learned that my classmates think I am lost (or at least unknown). This note is to inform everyone that I am alive and well and living in Bakersfield. I have been married twice and have 4 kids (from the second husband.) Now divorced from the kids' dad, I work as an IT specialist in graphic design and "webmastering" as well as creative writing for collateral materials used by businesses. My secondary employment is jewelry design and manufacturing. valkyrie@bak.rr.com

03/23/08 7th Annual Alumni Golf Tournament: The date has been set and the applications will start coming in almost immediately for this annual event. It has sold out early for the past two years, so if you want to field a team, get your name in the hat early. We need more representation by members of the Class of 1972, so if you are a golfer or an outright hacker, it's a shotgun format and if even one of your team can play golf, you have a chance. For more information or an entry form, check out the alumni website at www.arvinalumni.org today.....

03/12/08 Inaugural Rocky Handy Scholarship: On Thursday evening, May 15, 2008, the very first Rocky Handy Memorial Scholarship is set to be handed out at the annual scholarship awards ceremony at the Jack Schultze auditorium in Arvin, California. Members of the Handy Family and our own James 'Weasel' Williams are going to be on hand to present this first award. The scholarship was endowed to fund at an annual level of \$600, but in memory of the recent passing of Rocky's father, Faye Handy, generous donors have boosted that to \$1,000 for this first recipient. The Arvin High Alumni Association (AHAA) reports a total of 83 applicants in all categories with as many as 20 scholarships from the AHAA up for award. Check back on this web site for the latest details...

03/09/08 Jeff Campbell Writes: I moved from Colorado and my family is at our house in Wickenburg, AZ. I am only able to be home with them on the weekends now. I am working for Freeport McMoran Copper & Gold Morenci Operations (formerly Phelps/Dodge) in Morenci, AZ. I returned to work for them after they approached me and offered to bring me back as their Chief Environmental Engineer. There is a warmer climate here than in Colorado and I can golf and team rope year 'round here. The pitfall is that I travel 5 hours on Monday morning and repeat the travel again on Friday night. At least the drive to Arvin this year for the Alumni Golf Tournament will be shorter...Later, Jeff
